

Motorola Matrix Message Pager

Versatile

The Motorola Matrix message pager is small and lightweight with the ability to display messages of up to 240 characters, using a two-line backlit display.

It has a 20 message memory and can be programmed with a silent alert or a range of audible alerts.

Discreet

For complete discretion, it can be programmed to alert you silently of an incoming message. You can also choose from a range of audible alerts.

Reliable

You can rely on receiving your messages within seconds. Paging Networks use advanced satellite technology to relay messages to you via transmitters located across the UK.

Easy To Use

To send a message, callers simply dial your pager number (which connects to the 24-hour Paging Call Centre) and leave the message with the Call Centre operator. Alternatively, messages can either be sent by direct input into a PC (with relevant software and a modem) or via e-mail.

Call Charges

Calls to this pager from BT landlines are charged by the length of time you are on the phone. The pence per minute price also varies according to the time of day.

The BT tariff code is 'r - Calls to Pagers & Voice Messaging Services'.

Other operators (including mobile networks) may charge different rates.
